About Us

Established in 2006 with the partnership of 8 companies to sort and pack shell eggs. To meet the changing consumer demands, legal regulations and EU standards, our business evolved to the production of pasteurized liquid eggs.

As our business grows and evolves, the only thing that do not change is the values and goals we share. Our values guide us in our business, add meaning to our work and interpret how we want to achieve our goals.

Mission

To provide delicious, functional, and practical solutions to our customers with the focus of sustainable protein strategies.

Vision

To promote the use of egg products in every meal for human health and a sustainable world.

Sustainability

We incorporate sustainability into our processes throughout the value chain to ensure the success of our company both today and in the future.

Values

Entrepreneur & Innovative
Sustainable & Caring
Participating & Result Oriented

Governance Principles

People Oriented
Transparent
Accountable
Participant

Production Process

We carry out our production in Konya 3rd Industrial Zone with Turkey's highest capacity and most advanced technology pasteurization unit.

Our Products

Pasteurized Liquid Whole Egg

Ingredients

Ready-to-Use Whole Egg

Egg Equivalence

1 kg equals approximately 22 whole eggs.

1 cup of Ymrta whole is equal to 4 shell eggs.

Usage Areas

Breakfast products (omelette, pancakes), cake, sponge cake, pastry, processed meat products, dessert (tulumba, baklava, eclairs, etc.)

Storage Conditions

It should be stored at 0-4 °C and transported with refrigerated vehicles.

Pasteurized Liquid Egg Yolk

Ingredients

Ready-to-Use Egg Yolk

Egg Equivalence

1 kg is equal to approximately 56 egg yolks

1 cup of Ymrta yolk is equal to 12 shell egg yolks

Usage Areas

Mayonnaise, Salad Dressings, Ice Cream, Cream, Glazing (Pita, Cookies, Pastry), Dessert (Souffle, Cream Caramel, etc.)

Storage Conditions

It should be stored at 0-4 °C and transported with refrigerated vehicles

Pasteurized Liquid Egg White

Ingredients

Ready-to-Use Egg White (Pure Albumen)

Egg Equivalence

1 kg is equal to approximately 34 egg whites

1 cup of Ymrta white is equal to 8 shell egg whites.

Usage Areas

Types of Cookies (Acıbadem, Coco), Meringue, Protein Drink, Doner Kebab, Macaron

Storage Conditions

It should be stored at 0-4 °C and transported with refrigerated vehicles.

Package Alternatives

Products	Whole Egg	Egg Yolk	Egg White	Shelf Life
1 kg Carton Box				30 days
Aseptic Bag (5,10,15 & 20 kg)				21 days
1.000 kg Tank				7 days

Pathogens, especially *Salmonella*, found in shell eggs may pose a risk to consumer health and place eggs in the riskiest food category in industrial kitchens. Pasteurized liquid eggs should be used to avoid these pathogenic bacteria inherent in shell eggs, and to minimize the risk in industrial kitchens.

All our processes comply with **ISO 9001:2015** and **ISO 22000:2005** standards. Our products have Halal and Kosher certificate.

We guarantee sustainable food safety and quality performance by implementing effective quality management systems.

Advantages of Pasteurized Liquid Egg

Standard Quality

Pasteurized liquid eggs have all the characteristics of a shell egg in terms of nutritional values, taste, and functions.

While quality standards vary in shell eggs, standard product quality is ensured with pasteurized liquid eggs.

Economic

The losses that may occur during the storage and transportation of shell eggs are prevented by using pasteurized liquid eggs.

During breaking of shell eggs, 1/5 of the egg is wasted with the shell.

In applications where only egg white or yolk will be used, pasteurized liquid egg yolk and white can be supplied separately.

Safe

Sustainable quality and hygiene standards are ensured by regular microbiological controls and laboratory analyses.

Hygienic

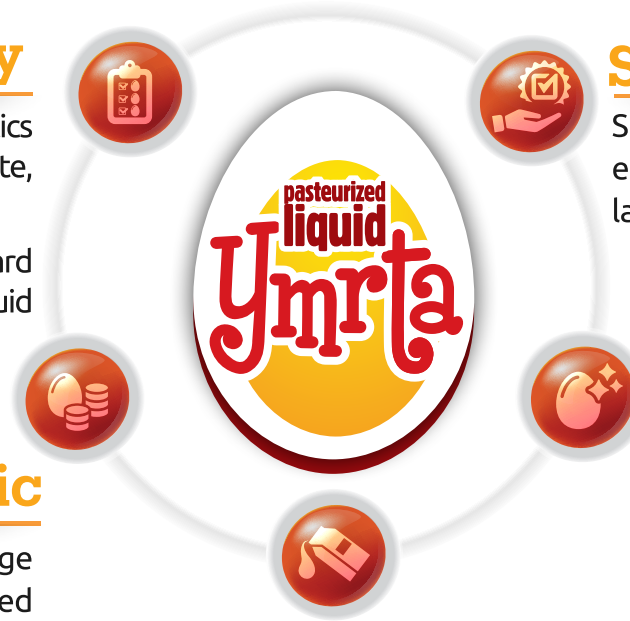

As a result of contamination, Salmonella, Coliform group, and other pathogenic bacteria's may pose a risk to consumer health in shell eggs. Pasteurization removes these risks.

Practical

Pasteurized Liquid Egg is supplied in practical packages, considering the labor and economic losses that the consumer will suffer.

Pasteurized liquid eggs take up 65% less space in storage than shell eggs.

It takes about 30 minutes to break 1 box of eggs (360 pieces), while adding an equal amount of Pasteurized Liquid Ymrta takes only 1 minute.

Our Policy on Quality, Food Safety, Occupational Health and Safety, Environment

Anako Yumurta is a reliable, innovative, competitive, pioneer and leader company in the market in providing products and services in the egg and egg products sector. Anako, adopts the following statement as its quality, food safety, occupational health safety and environmental policy and undertakes to work according by providing access to all relevant parties.

- To offer quality and reliable products in compliance with the current legislation and laws by keeping the customer focus and satisfaction at the forefront throughout the value chain,
- To carry out continuous training activities to increase the knowledge and skill levels of the employees by adopting an educated and conscious employee approach at all levels,
- To carefully select the source of our products with our supplier trainings and high experience, and to verify the adequacy of all our suppliers with effective monitoring and quality control in our production,
- To manage the storage and shipping processes in a way that best preserves the unique features of the product,
- While increasing the quality of our products and activities, to keep under control and minimize the possible significant effects of our activities on the environment and human health,
- To provide the necessary human, technology, and financial resources for the efficient use of natural resources and energy, in line with our sustainability principle, adhering to universal values,
- To ensure that occupational diseases and work accidents do not occur or be minimized by evaluating all risks regarding occupational health and safety with the participation of all employees,
- To create work areas where our employees can work safely, comfortably, and happily, To always keep work safety at the highest level by adhering to our values,
- To have continuous improvement in our processes, especially in production, by following the latest technology
- To create food safety awareness throughout the value chain by communicating effectively with all our stakeholders, especially our suppliers, customers, and dealers,
- To continuously develop and improve our quality and food safety management system with the participation of all our employees.

Sustainability

Nowadays, businesses face different trends and challenges such as macroeconomic developments, demographic changes, climate crisis, industrialization and digitalization. We believe that the businesses should be a transformative power for ensuring the food security and making a better future for the growing world population.

To contribute to this transformation and make egg products accessible for everyone and environmentally friendly, we created our sustainability strategy and set long term goals. We are tracking our progress in five areas such as environment, value chain, human resources, innovation and society. We believe that we will achieve our goals by determination and support of all our employees and business partners.

Egg was selected as the Star Ingredient by the United Nations in 2021 due to its role in the nutrition of the growing population and being a sustainable protein source.

Egg has been classified by the World Resource Institute as the most sustainable and accessible protein source.

We signed United Nations Global Compact in February 2018 and the Women's Empowerment Principles (WEP) in December 2017.

Since 2017, every year we are publishing our sustainability approach and performance in line with UN Sustainable Development Goals and GRI Standards. [Click here](#) to access our sustainability reports.

Our Activities

Egg is a sustainable protein source with a great potential. We are continuously working to turn this great potential of egg into reliable and delicious products for everyone. In order to guarantee the success of our company both today and in the future, we integrate our sustainability approach throughout the entire value chain, thus ensuring long-term value creation and ensuring the participation of our stakeholders in our success. Our sustainable development strategy focuses on three key topics: People, Society and Environment.

Health & Welfare of People

We are working to bring the potential of the egg accessible to everyone. We continue to improve our operations by assuring the quality of our products and using new technologies.

Development of the Society

We are working for a value chain that has the same ethical values and working principles as us and focuses continuous development. Thus, we contact with many sub-sectors and we provide employment in different segments and support social development.

Environmental Sustainability

Egg is selected as the most accessible and sustainable protein source by the United Nations. In order to minimize the environmental footprint of the egg, we use water and energy efficiently, increase our renewable energy production and strive for zero waste.

Memberships and Collaborations

We strive to be a part of sectoral organizations in our sustainability journey and to be a part of national and international initiatives. We are working to give direction to industry-specific developments and sustainability studies by increasing our communication and expanding our sphere of influence through collaborations with the NGOs.

Women's Empowerment Principles İmzacısı

We are a signatory of the UN's WEP organization, which works for gender equality and women's empowerment. By signing this commitment, we support our female employees to play an active role in management.

Global Compact İmzacısı

We are a signatory to the United Nations Global Compact, the world's largest corporate sustainability initiative. We voluntarily report our contributions to sustainable development and our environmental and social performance.

International Egg Commission

By following international trends and new technological developments in our industry, we evaluate potential collaborations with our industrial partners.

Egg Producers Products and Industrialists Association

We support the work of YÜSAD for the development of the egg and egg products sector in Turkey.

Turkish Industrialists and Businessmen Association

We are increasing our area of influence and knowledge in the Food, Beverage and Agriculture Working Group operating under TÜSİAD.

Sustainable Development Association

We believe in the importance of cooperation, common value creation and experience sharing in the field of sustainability, and in this context, we participate in SDA's working groups.

Association of Out-of-Home Consumption Suppliers

Under the leadership of ETÜDER, we received the "Reliable Supplier" certificate by passing independent audits within the scope of the Reliable Supplier Program supported by the Turkish Ministry of Agriculture and Forestry.

Food Safety Association

We cooperate with the Food Safety Association to raise awareness of food safety in our society. We became the gold sponsor of the Food Safety Congress held in 2022.

Middle East Technical University

Within the scope of university-industry cooperation, we develop projects with universities in line with our needs and support the knowledge-based development of the country's economy with leading academics in their fields

We Provide Our Energy From Renewable Resources
